PROFESSIONAL SUMMARY

MCA candidate with hands-on software development experience gained through internship and academic projects. Skilled in Java, Python, C, C#, JavaScript, React.js, Node.js, ASP.NET Core, SQL, MySQL, and SQL Server. Experienced in developing web applications, RESTful APIs, CRUD operations, JWT authentication, role-based access control, database integration, and frontend-backend integration. Strong foundation in OOP, DBMS, Data Structures, Operating Systems, Computer Networks, and SDLC. Seeking an entry-level Software Developer, Full Stack Developer, Web Developer, or IT role.

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C#, JavaScript, SQL

Frontend: HTML5, CSS3, React.js, React Router, Axios

Backend: ASP.NET Core, Node.js, Express.js, RESTful APIs

Databases: SQL Server, MySQL

Core Concepts: OOP, DBMS, Data Structures, Operating Systems, Computer Networks, SDLC

Development: CRUD Operations, API Integration, JSON, Authentication, Role-Based Access Control, Search, Filtering, Pagination

Tools: Git, GitHub, VS Code, Swagger, Jira

INTERNSHIP EXPERIENCE

Technoforte Software Pvt. Ltd.

Full Stack Developer Intern | Bengaluru, India | June 2026 – Present

Technologies: React.js | ASP.NET Core | C# | SQL Server | JWT

- Developed web application modules using React.js, ASP.NET Core, and SQL Server for employee management and meeting attendance.
- Developed and integrated RESTful APIs and implemented CRUD operations for Department, Manager, and Employee modules.
- Implemented JWT authentication and role-based access control for Admin, Manager, and Employee users.
- Developed automatic daily meeting creation with working-day, weekend, and holiday handling.
- Implemented meeting attendance tracking and monthly reports with filtering, search, pagination, and attendance percentage calculations.
- Worked on chatbot integration and R&D to provide role-based responses for application-related queries.

PROJECTS

College Event Management System

React.js | Node.js | Express.js | MySQL

- Developed a full-stack web application to manage college events, approvals, registrations, and participants.
- Built RESTful APIs using Node.js and Express.js and integrated them with a React.js frontend.
- Implemented role-based access control for Admin, Dean, Department, Teacher, and Student users.
- Integrated MySQL database for storing and managing users, events, registrations, and related data.

Developed a deep learning-based image classification system to classify apples as fresh or rotten.

- | Marketing | Management | Support |
|--|--|---|
| 1. Identification of the market and its segments | 1. Identification of the company's mission and vision | 1. Identification of the company's resources and capabilities |
| 2. Analysis of the market environment | 2. Analysis of the company's internal environment | 2. Analysis of the company's external environment |
| 3. Selection of the target market | 3. Selection of the company's strategy | 3. Selection of the company's support functions |
| 4. Development of the marketing mix | 4. Development of the company's organizational structure | 4. Development of the company's financial system |
| 5. Implementation of the marketing plan | 5. Implementation of the company's strategy | 5. Implementation of the company's support functions |
| 6. Evaluation of the marketing results | 6. Evaluation of the company's performance | 6. Evaluation of the company's support functions |

Developed a web-based application for managing boutique bookings and billing operations.

- ## EDUCATION

Master of Computer Applications

Bachelor of Computer Applications
